Standard Times

The purpose of the Benchmark Standard Time (BST) is to compare performances across the day and at different tracks. The BST takes into account the actual race time and sectionals run, then makes allowances for the class of the race and the track conditions.

It is expressed as being faster or slower than the average BST for that class and distance with a '+' figure for faster and slower with a '-' figure. The number beside those figures indicate the lengths slower or faster than the average BST. The average BST is arrived at after taking into account many races over that distance in that class, on that course.
